

Brochure Assembly Instructions:

1. Print brochure pieces out on high-quality, specially coated paper (Polystock II 145 is recommended)
2. Crease sides along the sub-mid and hypo-mid meridians of the pages.
3. Secure Epoxy. Midland's Glu-Wandelle (#224-704-55864) or Glaant's Gluminspel (#224-704-87500)
4. Use selected Epoxy on Front Page 1's back. Make sure you do this in a room free of dust and items. Add epoxy to corners A, Ax, B, B3, and C. Never use more than 15 drams of epoxy.
5. Set Front Page 1 aside for now.
6. Find Reverse Side 2. Use twice as much epoxy on Reverse Side 2's reverse as you did on Front Page 1's front. This is necessary due to certain constraints associated with brochure design. Add epoxy to corners 9, 10, 11, 12, 8, and 9.
7. **DO NOT LET FRONT PAGE 1 DRY.**
8. Affix Front Page 1's back to Reverse Side 2's reverse. Make sure the two sides are aligned correctly by using a v-rule and a Maxis Edger. If the sides are aligned, place the unified pieces between two large tomes.
9. Let brochure dry for hours.
10. Refold original folds (j and jj)
11. Brochure is ready to inform you.
12. For more information, trivia, and stories about the history of brochures and the deadly art of folding paper please [click here](#).

Sky Diver © 2005 Atari Interactive, Inc. All Rights Reserved.

Get trained, get ready, get on the plane, and get AIR. Airborne that is. Overcome your fear of heights as you battle gravity and high-speed winds and make your way to the target 1000 feet below. As your skill improves you can go after smaller targets and moving ones as well. Bring a friend along for twice the fun.

FEATURED FPG TOUR

SKYDIVING MANIA

Vacation Package Includes: airfare, hotel accommodations (4 days + 5 nights), meals, equipment rental, and plane usage.
